LOGICWOOD LINEAR - 920 mm

LogicWood Linear is a bioethanol burner for built-in fireplace solutions, combining multiple flame lines with a realistic wood effect. The Split Flame Configuration distributes the flames across separate flame tubes, allowing ceramic logs to be arranged naturally between the flames. Ceramic logs and an illuminated ember bed create depth and a natural flame appearance. The burner delivers a calm and uniform flame pattern, while integrated lighting enhances the ember effect. Suitable for installation in non-combustible materials.
